Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-8 and 11 are rejected under 35 U.S.C. 102(b) as being anticipated by Rader (US 5,063,859).

Rader discloses a railcar having a box shaped body extending longitudinally and having a plurality of interior compartments. The interior compartments include an upper deck of seats and a lower deck of seats and are sectioned into the front and rear of the car. The compartmentalization is shown in figure 9-11. A door 66 is arranged on the side of the car in the middle of the side wall structure as shown in figures 4 and 5. The door 66 opens to stairs 64 accessing the different decks of the car. The car does not have doors at the ends of the sidewalls. However, the car does have access doorways 47 on the longitudinal ends of the car.

Claims 9 and 10 are rejected under 35 U.S.C. 102(b) as being anticipated by Nieveinstein (DE 44 42 368 A1).

Nieveinstein discloses a railcar body having an upper and lower deck with passenger seats. Side doors are installed on the sidewalls of the car body away from the longitudinal ends of the car and open to access stairs to the upper and lower decks

of the car. A common bogie as shown in figure 1 supports longitudinal ends of adjacent railcars.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Clary (US 2,636,454) and Reynolds (US 2,698,569) both disclose various types of railcar structures.
